Saw this Mach 1 for sale on S. Campbell and had to do a double take on it. It looks just like Tony's. The color is the same, my cell phone sort of made it look a bit lighter than it really is.

That is the 03 we have a 04 there was a slight color difference between the two years. The 03 had the zinc yellow and the 04 had the screaming yellow. There was a quite a few difference in the motor as well.

What differences were those?

It may very well have been a lighter yellow. I would probably need to see them next to each other. It certainly looked lighter in the photos I took.
